Lesson for Wednesday, Oct. 18th

Questions: Please call me 341-7687

FYI: There are **NO** passwords setup on your existing laptops.

Today you will continue to work on your **Halloween** Webpage.

On Thursday we will continue to install the software on the older laptop. We will also review what steps and procedures are necessary when installing software on a computer. We will also take a quiz over the steps for installing a computer.

NOTES for Upcoming QUIZ:

Always begin installation process with: Original OS CD's, DRIVERS, etc.

Make sure you install the Operating system, then the antivirus, then the Windows Updates.

The computer may require additional drivers to function properly. Continue with the :

1. Install Dell True Mobile – Wireless Software & Drivers (auto run CD)
2. Install Dell Resource CD—Begin with the Chipset Driver, unzip then go to the next necessary driver. Video, etc.
3. Install the OFFICE software the school has previous license for.
4. Install the adobe acrobat software
5. Install the adobe flash software
6. Install the adobe shockwave software
7. Install the Macromedia & Cute FTP (school software)

Your computer should now be ready for just about any task that you may encounter.

Remember to always get in the habit of downloading Windows UPDATES weekly.
